## Business segments

Given the significant changes in the scope of consolidation in 2007 and 2008, to ease comprehension of performance, figures for the travel retail & duty-free and in-flight segments are also provided on an annualised basis. These figures have been calculated by supplementing the data from the Group's accounting system with financial information drawn from the internal reporting systems of the acquired companies, which has been adjusted as necessary and is neither audited nor subject to the Group's administrative and accounting procedures<sup>1</sup>.
