

## Site requirements

### Video resolution

The site is optimized for a video resolution of **1024x768** pixel (or more), with a number of colours no less than **32 thousand**.

### Browsers

The site is designed to be properly viewed using the following browsers:

- [Internet Explorer 6](#) [1] and above
- [Mozilla Firefox 1](#) [2] and above
- [Safari 1.3.2](#) [3] and above

### Content

Some site content is only available in **Adobe Acrobat** format. This makes it necessary for site users to install the relevant programme (downloadable free of charge from the producer's site) on their computers. Some content is available in **XLS** format, making it necessary to install the display programme downloadable free of charge from the producer's site.

### Javascript

For the entire site to work properly, users' browsers must be set for **Javascript code**. Refer to the browser's guide to check the settings.

### Applications

Some applications on the site were developed with **JAVA technology**. To make sure they work properly, users' browsers must be set for the relevant code.

Some applications and content are available in **Adobe Flash** format, so the relevant plug-in (Flash Player 6 or above, downloadable free of charge from the producer's site) needs to be set.
